

Hornby Railroad Mk 1 Coach

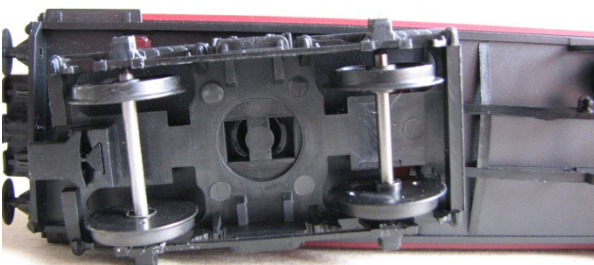

Hornby's new railroad Mk 1 coaches are supplied with plastic wheels – fine for a budget range coach, but how much better they would perform with a wheel with metal tyres....

Re Wheeling .

1. Invert the coach using a suitable support. We use a foam cradle – the Peco loco service cradle being ideal.
2. Simply spring out the Hornby wheelset.

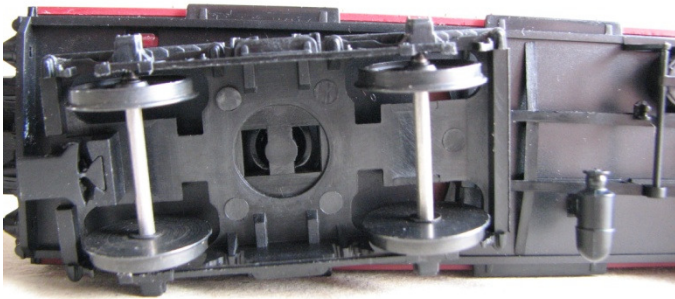

3. Replace with Gibson wheelset.

Gibson wheels on the left, Hornby on the right.

4. Repeat for remaining axles.

Re wheeled bogie. EM wheels used in Picture

It's that easy!

Plenty of room for the wider EM/S4 gauges too.
